Native Prairie Appreciation Week

Title: Stewards of Saskatchewan: Getting to know our prairie Species at Risk

Speakers: Carmen LaBelle and Rachel Ward, Habitat Stewardship Assistants, Nature Saskatchewan

Summary: Join Nature Saskatchewan to learn about Species at Risk in Saskatchewan! The presentation will give a general overview of prairie Species at Risk information, highlight a few examples of Species at Risk that call Saskatchewan home, and how you can help!

About the Speakers:

Carmen LaBelle has grown up in Regina but had the advantage of numerous family farms and favorite camping spots to adventure to. She graduated in the fall of 2019 from the University of Regina with a Bachelor of Arts Degree in Geography, a certificate in Sustainability and with additional focuses in Geology and Geographical Information Systems. This is her first summer term working for Nature Saskatchewan as a Habitat Stewardship Assistant. She is excited to pursue and share her love of the environment and conservation, as well as to continually learn about her home province!

Rachel Ward grew up in Calgary, AB and spent many summers on the family farm near Spalding, SK. This instilled a strong love of both mountains and prairies, as well as an appreciation for the incredible diversity of the natural world. Rachel completed a Bachelor of Science at the University of Calgary with a double major in Zoology and Ecology and is pursuing a career in conservation. Rachel will be working for Nature Saskatchewan this summer as a Habitat Stewardship Assistant. In her spare time Rachel enjoys camping, hiking, bird watching and training for dog sports with her chocolate lab.
